

Industry Partner Alliance Manager
Break Through Cancer

Break Through Cancer is a new type of foundation which empowers outstanding researchers and physicians to intercept, as well as find cures, for the deadliest cancers by stimulating radical collaboration. It represents a first-of-its-kind collaboration of five of the top cancer research centers in the world: Dana-Farber Cancer Institute, Johns Hopkins Sidney Kimmel Comprehensive Cancer Center, MIT's Koch Institute for Integrative Cancer Research, The University of Texas MD Anderson Cancer Center, and Memorial Sloan Kettering Cancer Center.

Break Through Cancer is focused on several of the world's deadliest cancers: initially glioblastoma, AML, ovarian, and pancreas cancers. These are diseases with poor prognoses for which progress has been very slow. We are looking beyond conventional therapies, utilizing new strategies, structures, and thinking from across disciplines, with the goal of enabling discoveries at an unprecedented pace.

Break Through Cancer's success will rely on mission-driven partners who share our sense of urgency to transform the cancer ecosystem to support the next generation of cancer treatment and prevention. Break Through Cancer has initiated discussions with pharma, biopharma, biotech, and high-tech companies to explore ways of working together as part of a shared community. This community will be centered around the Break Through Cancer Industry Partner Alliance, a membership model for pharma and biotech, which will be supported by a suite of multi-institutional sponsored research and clinical trial agreements designed to simplify interactions and foster scientific progress.

Break Through Cancer seeks an organized, passionate, and enthusiastic Industry Partner Alliance Manager to report to the Senior Director, Science Programs. The Alliance Manager will coordinate the activities of the Break Through Cancer Industry Partner Alliance (IPA), including the stewardship of strategic partnerships that help to foster the work of Break Through Cancer teams, strengthening relationships with a diverse set of biotech and pharma partners, and developing strategies to ensure partnerships are beneficial to all parties. Responsibilities include:

- Work closely with the Chief Science Officer, Chief Data Officer, Programs Team members, and members of Break Through Cancer-funded teams to understand the needs of the different projects and drive new partnership plans with IPA members;
- Maintain a network of strong relationships across industry partners and participating institutions who can directly impact the successful implementation of the IPA; and
- Manage and monitor joint goals, progress, issues, and overall health of the IPA;
- Identify and manage potential challenges in IPA collaborations including management of human subjects and intellectual property obligations, contingencies, timelines, resources, and other issues, with emphasis on contracting; and
- Provide operational oversight and metrics that focus on the consistency, scalability, cost effectiveness, and overall process efficiency in the IPA.

Qualifications

- 3+ years of experience in alliance management, business development, life sciences, or related field;

- Experience building and managing successful relationships between scientists, clinicians, and data scientists between academia, high-tech, and biopharma;
- Excellent interpersonal /relationship management skills and proven ability to facilitate internal alignment;
- Excellent verbal and written communication skills; ability to connect effectively and diplomatically with a variety of stakeholders.

To apply for this position, please submit a cover letter and cv to: info@breakthroughcancer.org In your cover letter, please answer the following:

1. What has motivated you to apply for the Industry Partner Alliance Manager role at Break Through Cancer, and in particular, what inspires you to work for a foundation that is dedicated to cancer research?
2. Describe your experience managing relationships between researchers and industry partners.
3. Provide examples of how you have navigated politically complex and matrixed environments.
